READ THIS FIRST : What is this website? Why is it here? . This website is not associated with Autodesk or any of its products/services. It's not a resource or store for AutoCAD users or a place for people to share their own work. It's just a resource for AutoCAD users. If you were looking for AutoCAD websites, then you came to the right place, not the wrong place. That's why this website is here. Why do I need to read this website? . This website is here to help you improve your AutoCAD skills. You may find AutoCAD tutorials and learning resources online. They're useful and may be useful for you. Or, you may find a forum that answers your AutoCAD questions. They're helpful too, but there are some forums that are better for certain questions than others. Some forums are for AutoCAD users of one country or region, and some are for AutoCAD users of other countries and regions. Some forums are for AutoCAD users who are new to the program or are experienced, and some are for AutoCAD users who are intermediate

and advanced. If you're a beginner, then you're a beginner. It's natural to make mistakes and ask questions in forums. But some forums are too crowded, and it can be hard to get a hold of the right people to help you. It can take forever to reply to a forum posting (if you even get a reply), and you may not get a reply at all. This website is different from forums because it's a website. It's a place where you can read and learn about AutoCAD, in one place. You can see people's photos and read their posts, comment on their posts, send messages to other people, and get replies in real-time. You can also have an active discussion with other AutoCAD users right here, right now. When you use this website, you'll see more AutoCAD users who are also looking to improve their skills, and more people who are trying to solve their AutoCAD problems. Can I trust this website? . This website is owned and operated by Steve Kilberg. It's not controlled by Autodesk. It's not owned by anyone else. It's not a subsidiary of Autodesk or a part of
