Set is a pharaoh who likes to give his enemies a good hiding. He splits his soul to trap other gods into eternal battle and takes over the throne of the Underworld. Your goal? To become the true victor, and get revenge on the other gods, to be a pharaoh forever. The Prologue The story begins in an unknown time with a god, or maybe a demigod. He asks a friend for a favour: "Is it possible for me to split my soul? Being immortal would be cool, but not if I get stuck in this small world." "No problem. You are just a god, and therefore my friend! Take my advice and have a good time. If it gets boring, just travel around. Your soul will continue to fight for you!" The friend nods gratefully and disappears. Set takes his time exploring the lovely castle at the top of the pyramid. The game starts with the first level. The game has six levels with different puzzles to

---

solve, and at the end of the game, four bosses to beat. As you play, your levels get more difficult to face, more and more enemies to beat, and more and more weapons to use. Level 01 Start The hero enters the castle in which he will be getting and solving the puzzles. "Hello, welcome to Level 01. I am a temple for the likes of you. Here, you can travel in time and space using your soul. We have no escape. We are trapped for eternity. Your goal? To go upstairs and defeat the first boss, the guardian of this temple." The hero enters the next level, Level 01 is about relaxing and exploring. Each path and floor gives you new items such as birds to use, arrows, and various decorations. Level 02 Start The hero arrives in the next level. If you are on the first level, you will still have the map (a map of all the available levels) at the start. "Hello, welcome to Level 02. This is the game's first level. Unlike the previous one, you don't need to solve any puzzles. You can just walk, and explore the levels. You can be smart, or simple. If you want, you can even return to the previous level by going back on the map. This way, you can not only travel through time and space, but also in time. This is fun. I've

### **Nyctophobia Features Key:**

- Arcade style pinball game
- Mini carts(write your own)
- Multiple modes to choose from
- Load your own background music and sound effects
- Write your own backgrounds
- Short but fast tip juggling game
- Multiple player online support
- Filter based team colors to make it as simple or as complex as you like
- Designed with use of Tilemaps

---

## Main Game Concept

Baseball Riot is very easy to understand. It's the classic baseball game with pinballs. But I still decided to make this version interesting by adding in additional features such as:

- backgrounds
- dozens of sound effects
- English/French language
- core of the original pinball game idea
- support to load background music & sound effects

## Gameplay

Each game consists of five game modes, each one of which plays a different length. The game progress through them progressively, with each game mode being easier than the previous. What makes this Arcade game idea a little different is the fact that there are DOUBLE sized mini plastic balls.

## Game Modes

- Baseball Daydream
- Fun House Scramble
- 5 Yard Challenge
- 4 Yard Start to Finish
- All-Star Game

Playing "We'll always have Paris" isn't any different to playing many of the dozens of point-and-click adventures on the market. You click on items and read short descriptions to progress the game. However, what makes this game special is the elegant art and thoughtful script. The story is compelling, but not muddled and explores themes that will resonate long after you've completed the game. Also, the screenshots of Paris aren't cheapened by being hastily taken from an internet search, and the main character is actually an adorable puppy with a Scottish accent. - ----- Overall: This is a beautifully heartwarming story about two people dealing with the grief of love. Everything about this game, from the emotions involved, to the gameplay mechanics, to the story, is spot on. While "We'll always have Paris" doesn't always fulfill its promises, it has everything you could ask for out of an interactive story. The dialogue is perfect, the art is both gorgeous and moving, and the gameplay is intuitive and cohesive. It only takes a few hours to get through, but the impact will last for much longer.

9.0 / 10 The Game Crater The Short Version: We'll Always Have Paris is a splendid point-and-click adventure. The story isn't perfect, but it's an excellent example of how you should be writing dialogue. The Long Version: This is a story that would have been heart-wrenching even if it were set in a far-off fantasy land. So when I saw it was set in the real Paris, I had to read it. When I did, it did not disappoint. We'll Always Have Paris is a thoughtful story about the timelessness of love. The story features characters that are both complex and

well-rounded. Most of all, the writing is perfect. This is a well-crafted story about two people who are dealing with the grief of love. You don't need to be familiar with French history or culture to get what's going on. The game's dialogue is so natural that you could hardly believe it was scripted. The Art The visual design makes We'll Always Have Paris a very visually appealing game. The Parisian scenes look gorgeous, and the use of color is tasteful. There are no overly-vibrant colors that might distract from the story. The backgrounds are purposely colorful to complement the items and characters, as well as set the tone of the scene. We'll

We will ask for your agreement to extra shipping charges when your order is placed. With more and more formula One based games coming out, we thought we should release a game that focuses on people in the circuit, rather than on the racing... anything for six weekends of total madness. We have ended up with a game that should provide a great experience in a multitude of ways and we hope you will enjoy it. The game set in my personal favourite circuit, the French not the short circuit. Over the weekend I drove 2,400 miles testing some of the circuits in the game. I drove through the 4000 climbs, across over 100 hairpins, through 600 corners and lots of tricky straights. At each location I tested tracks from Misano to Avon for a variety of weather conditions**

**(mostly sun, with some rain). It was a real test and added a few different scenarios to the game, so many thanks to my test crew who helped me out. There are also 3 bonus circuits, one of which is a famous Circuit of the Americas, to add diversity to the game. The end result was that we ended up with a much more solid game than we had initially hoped for. The game mechanics are very traditional in terms of flight and ground features; they are designed to be simple to learn, yet offer an abundance of challenge. We wanted to avoid being too gimmicky or too simplistic in order to provide a realistic sense of being a World Touring Car driver. Our motto was, "If you only have a car with two legs, then you will feel more like a real driver". For those of you who are more familiar with the World Super Touring championship, please be aware that we have decided on the number of race events being 13, just like in the championship. Each driver is only allowed a certain number of events based on their ranking (i.e. one race point for a 6th, two for a 5th etc). In the FIA Supercup, each of the teams take an equal number of races. We ended up with 26 race events which gave us a good number of different scenarios. If you like the idea of this game you**
