**Save a File** Save a file is simple when using Photoshop. First, open the folder where you want to save the files. See the previous chapter for instructions to open a folder or folder view. On the Home tab, choose File | Save As. In the File name box, enter a file name. Type `_PhotoshopLayers_` if you want to save the file with the `_Layers_` name extension. If you want to save the file with a different extension or filename, choose `_Save for Web_` and type a file name in the Save for Web box. Note that the Save for Web options automatically open a File menu. This is very convenient because you can then choose to open the

file or save it to the computer. Leave the location as the current location or choose a new location. If you choose a new location, you can specify where you want your files saved.

[Problems of internal medicine therapy of patients with endocrine and immune disorders]. The treatment of inorganic and organic diseases is based on two important principles. The first is the treatment of the underlying disease. The second is the correction of the systematic homeostatic disorders by affecting the endocrine or immune system. The author reviews the treatment of hypothyroidism, hormone dependent breast cancers, Hashimoto's thyroiditis, diabetes mellitus and so on. In the case of hormonal deficiency, the substitution of hormones is begun. The administration of hormones has to be started with a low dose and later

increased to the target value (in most cases this will be between 0.5 and 1.0 micrograms/kg body weight). The author suggests that stimulation of the thyroid stimulating hormone with hormone analogues may give better results than rhTSH treatment. For the treatment of autoimmune diseases, the aim is to eliminate the triggering stimulus and to stimulate a specific tolerance, this often involves the administration of cyclosporin, levamisole or budesonide.

Q: TabBarItem attributes in wp7 template I'm quite familiar with XAML in.NET4. But I'm trying to use a tab bar control with visual states in wp7. My question is, how do I use XAML to change the attributes of my tab bar? For example, I'd like the "add" tab to say "Add Item", and

the "update" tab to say "Update Item". A: I figured it out - I need to use a ToolBar instead of a TabControl. I was under the impression that the TabItem tag would work for the TabControl, but it will only create a TabItem with static text.

Utility of 2-photon microscopy and laser microbeam irradiation in the study of nerve cells and their behavior. One of the many applications of 2-photon microscopy and laser microbeam irradiation in research on membrane electrical and optical properties of nerve cells is to record the conductive and transmissive properties of the nerve membrane. The development of methods for non-invasive recording of membrane ionic conductances is described. The problem of reproducible targeting and

recording by laser microbeam excitation of a single channel in a given nerve cell is discussed. The experimental procedure for the recording of single channel currents is described and the gating patterns of single channel currents are demonstrated. The transmissive properties of nerve

We've been busy installing and repairing our new roof in the last couple of weeks. Along the way we have fixed an issue, so we're back on track! By day, the new (late) roof job (and two families) have made us reflect on what it is we do with our lives – what we seek and strive to create in the world, and who we are as

people. In our experience, human beings have evolved. We've learnt and developed over our lifetimes, and our path as a species has been to become increasingly complex and organised. This has included taking on and adapting the role of God. Humans are also teaching us. They show us how to live and work better, and how to learn (with a tool-kit of social skills, curiosity and wisdom). But each of our lives is different, and we come to this world with different needs, background, interests and capacities. And so we're constantly learning – which can be a hard path. We work and have our own lives, we get married, have children and then teach them, help them, hold them, fail them and succeed them. And, in all of these things, we get better. We're

reminded of this at our own school, where we have been teaching middle school students for 12 years. We are always pushing ourselves to grow and learn. I'm very lucky to work with a team that is equally committed to improving itself and the school. And we seem to be succeeding, which is nothing short of remarkable. The internet – and media in general – is changing our society, and even how we think of our own lives. Perhaps this seems self-evident, but this is not the case. People increasingly spend more time, in less time, on their phones and other devices. They multitask all day long, and leave only enough time to get back to their devices in the evening. As a result, we are experiencing a crisis in attention – and more people are focusing

on things that are, by and large, irrelevant to their lives, and are creating a staccato, information and distraction dominated world. In our school, we are interested in helping our students develop strong self-control, curiosity and concentration – skills that will help them learn. We are also aware that as educators, we're responsible for creating an environment where our students can learn to
