Five years ago, on .The present invention relates generally to the field of data processing, and more particularly to transformation of data through time. Data may be structured and stored in relation to a certain time, where the data may be transformed or transposed by a time axis.

For example, some data may have a time axis, where the data on the time axis may correspond to a change in a characteristic of the data at various points in time. Thus, data may be structured and stored in relation to a time axis. The effect of nitrate on peroxynitrite production and its nitration of mitochondrial proteins. Peroxynitrite has been proposed to mediate inflammatory and ischaemic tissue injury. As nitrates inhibit peroxynitrite formation, we tested whether these compounds inhibit formation of peroxynitrite in rat brain mitochondria. The present study shows that nitrates do not affect the formation of peroxynitrite in the presence of NADPH and arachidonic acid as substrate for cyclooxygenase and 5-lipoxygenase pathways. Furthermore, whereas 100 microM nitrite in the presence of the nitric oxide synthase inhibitor N(G)-monomethyl-L-arginine and NADPH oxidase inhibitor diphenyleneiodonium had no effect on peroxynitrite formation, the superoxide anion production was completely inhibited. In the presence of non-inhibitory concentrations of N(G)-monomethyl-L-arginine, nitrite reduced formation of all forms of nitrogen oxide. The addition of 6d1f23a050
