Chronic pain is a major clinical syndrome and a source of chronic suffering. Although central sensitization is considered a critical mechanism underlying chronic pain, the role of peripheral sensitization in chronic pain is still less clear. Previous studies have implicated purinergic signaling in peripheral sensitization. In this study, we used rats to investigate whether purinergic signaling participates in the development of neuropathic pain. Rat models of chronic pain were developed via the tibial and sural transection procedures. We examined the mRNA and protein levels of purinergic receptor subtypes and the activity of acid sphingomyelinase (ASM) in the spinal cords and DRGs of rats undergoing chronic pain. We found that in rats undergoing chronic pain, the mRNA and protein levels of P2X7 receptors (P2X7R) in the DRGs and the spinal cords were significantly increased. Similarly, the protein levels of ASM were significantly elevated. Exogenous ATP-induced mechanical allodynia was suppressed by intrathecal injection of the P2X7R antagonist A-740003. These data demonstrate that increased expression of P2X7R in the DRGs, spinal cord and peripheral nerves of rats with chronic pain is associated with the development of hypersensitivity. Uptregulation of P2X7R activates ASM, which may be a pathogenic factor in the development of neuropathy.Garcia Arias Garcia Arias is a Colombian professional footballer who plays as a midfielder for Argentine club Newell's Old Boys.
